Notes:  
1. This map shows public land use for three districts previously studied separately. It has been necessary to renumber recommendations to eliminate duplication. See Appendix 1 for a full list.  
The map also incorporates changes in public land, including purchases for conservation and softwood production purposes, and land exchanges, which have occurred since the final recommendations were published.  
2. This includes areas that have not yet been planted (refer to text for location).  
Some reserves cannot be accurately defined at this scale. These reserves are described in the text and approximate locations shown on this map by a coloured dot. e.g. D-8
