### SURVEY STATUS

Local and regional surveys at various sampling levels.

### Notes:

1. Site information supplied by the Victoria Archaeological Survey, and current to March 1989.
2. Site distribution is known from chance finds; local informants; and systematic local and regional surveys at various sampling levels. Refer to the Survey Status diagram for locations of surveys.
3. Site visibility and sampling levels affect the number of sites recorded during a survey.
4. It is estimated that the sites currently known represent less than one percent of those present.
5. Map compilation by Geographic Information Section, Land Information Branch, Ministry for Planning and Environment.

### LEGEND

- site location  
(many closely-spaced sites appear as solid areas)
- major rivers and streams
