I am writing regarding the use of crown owned land in Moreland including the Edgars Creek Parkland.

This land should be retained as public open space, and was acquired by Vic Roads for a freeway, but on cancellation of the freeway, I am of the strong opinion that it should be returned to the public as an open space forever.

I have lived at the above address for 67 years, and the reason I have lived here is because of the Edgars Creek Parkland. It has given my family and myself great benefit both physically and mentally in raising my family, and the friendships we have formed while enjoying the parkland itself. It is essential that the parklands be retained to give the advantages - I and my family have enjoyed - to future generations.

With increasing population in the area because of density living, puts greater pressure on our living space, and are destined for parks, such as now exists, to be very valuable in the future. Its environmental, ecological and recreational importance to the future community is so necessary that it is so obvious it remains as it is now, and I appeal to you to leave the parklands as they are now, and let the local council maintain them as they do now.

Yours faithfully

John Ki-Kenzi
