

Bioregional Reservation Status of Ecological Vegetation Classes (EVCs) in the River Red Gum Investigation area resulting from Draft Proposals

Guidelines for interpreting this table. An overall reservation status for EVCs in the River Red Gum Forests investigation area is presented in Appendix 10 of the Draft Proposals Paper. For the purposes of establishing targets for reservation, conservation status determined at the bioregional level is used. The Bioregional Conservation Status of an EVC in one bioregion in the investigation area may be different to that for the same EVC in another bioregion in the investigation area. A map of the bioregions that occur in the study area is available at www.dse.vic.gov.au (select 'Conservation & Environment' then 'Bioregions and Bioregional Planning'). The four main bioregions occurring in the study area are Murray Fans, Victorian Riverina, Robinvale Plains and Murray Scroll Belt. Smaller areas of a number of other bioregions also occur within the study area. The areas presented below relate to those portions of the bioregions occurring in the investigation area.

Bioregion	EVC No.	Ecological Vegetation Class	Pre-1750 Extent (ha)	Current Extent (ha)	Percent Remaining	Bioregional Conservation Status	Current Dedicated Reserve (ha)	Proposed Dedicated Reserve (ha)	Proposed Other Public Land (ha)	Proposed Dedicated Reserves as % of Pre-1750 Extent	Proposed Reserves as % of Current Extent
