

Map F: Strategic Biodiversity Values - regional analysis of public land outside protected areas

Relative contribution to conservation of the Central West Investigation region's biodiversity (based on a combination of scarcity, habitat condition and connectivity).

Investigation area boundary

Protected area

Major road

Major waterway or waterbody

Notes

The Arthur Rylah Institute for Environmental Research was commissioned by VEAC to prepare this analysis of Strategic Biodiversity Values in the Central West Investigation region, focusing on public land that is not currently in the protected area system. It shows the relative importance of these locations for the rare or threatened vascular plants and vertebrate animals of the Central West Investigation region. An outline of the methodology is included in appendix 4.
