- Notes:
- Except for parts, the reference numbers of the existing land uses listed in the legend and indicated on Maps A,B and C are the same as those described in the Land Conservation Council Final Recommendations for the Mallee area of May 1977. However, boundary changes and new reserves set aside after the 1977 recommendations have been incorporated. Some of the numerical sequences shown on the maps are broken because of proposed changes to the status of several of the existing reserves.
 - Some reserves cannot be accurately defined at this map scale; these reserves are indicated by a coloured dot, eg. O56.
 - Several townships include a number of reserves which are difficult to define at this map scale; details of these are held by the Council and copies are available on request.
 - The existing Pink Lakes State Park (49 600 ha) is part of the area now proposed as the Murray - Sunset National Park (A6).
 - Public land water frontage reserves cannot be accurately defined at this map scale nor are all reserves indicated. Refer to the appropriate Parish plan to determine the boundaries of the reserve and whether it is on one side or both sides of the stream.
 - Recommendation O2 south of Robinvale refers to land to be made available for township purposes. Other areas recommended O2 are not shown (see text).
