

- Notes:
1. Major rivers and streams are shown, but the small map scale has resulted in not all 3rd order streams being shown.
 2. The blue grid lines, and letters and numbers in the margins can be used to locate the rivers and streams listed alphabetically in Appendix 1. The grid rectangles cover 30' x 30', and are equivalent to NATMAP 1 : 100 000 mapsheet areas.
 3. The drainage basins shown are those used by the Australian Water Resources Council. They are major river catchments or groups of catchments.
